The Journal for Developers of Heterogeneous Computing Systems

<http://ersaconf.org/ersa-adn/>

Rapid-decision, peer-reviewed publishing commercial and academic papers
Rapid publishing whitepapers, product information and other advertisements
30% discount for research and technical papers
Discounts for companies to advertise products, whitepapers, ...
Discounts for Emerging Economy Countries

“The Application Developer News” - ADN is a new journal for industrial and academic researchers, commercial entrepreneurs, and developers.

Besides technical papers, ADN publishes whitepapers, product information and other advertisements from companies.

Call for Papers: *ADN invites students, researchers, academic and industrial professionals to submit:*

- *Manuscripts of academic and industrial research and technical papers*
- *Proposals for special issues, devoted for some particular application area, design methods, academic and industrial projects, University Programs.*

Advertising: *ADN invites companies for advertising their products. There are three main options:*

- *Company Logo plus link to Company or Event web-site*
- *Company Banner, it can be an animated GIF, but animation not required*
- *Company Logo or Banner plus Company or Event Info (half page + one image)*

Topics: *ADN topics of interests include but are not limited to:*
Design Methods

- *Heterogeneous Systems Architecture: Multicore, CPU plus FPGA,...*
- *High Level Design Tools and Languages for Heterogeneous Systems*
- *Adaptable, Distributed and High-Performance Embedded Systems*
- *Heterogeneous Run-time Environment and Resource Management*

Application areas

- *Defence, Military and Space Applications, Mobile and Communication Systems*
- *Big Data, Finance and Banking, Internet Security, and Cryptography*
- *Scientific Research, Automotive Industry, Oil and Gas Industry*
- *Digital Media, Autotainment and Digital Signal Processing*
- *Bio-sciences, Medical Systems and Bio-Inspired Architectures*
